THE STORY

Juanita NIELSEN

Juanita's Bar is named after one of Victoria Streets most famous former residents, paying tribute to an iconic and influential figure in our history.

Juanita Nielsen was an Australian publisher, journalist and activist for urban conservations and community issues – particularly anti-development campaigns.

She lived and worked in a tiny terrace on this very street and in her final years was campaigning through her newspaper to stop the destruction of Victoria Street, one of Sydney's most beautiful boulevards, by businessman Frank Theemean.

Juanita's determination through activism against greedy developers in the 70's saved the very building The Butler and Juanita's now call home, along with the historic terraces next door, from demolition.

Juanita Nielsen disappeared on 4th July 1975 and it's believed she is the first journalist in Australia to be murdered for what she wrote. Her efforts led to her disappearance, which remains a mystery to this day....
